

Castle Acre Neighbourhood Plan

Section 1. Return data for Neighbourhood Plan Questionnaire.

Castle Acre Population:
848 2011 census
693 2016 Electoral Roll

Household numbers:
370 on 2016 Electoral Roll
this represents 79.2% of the
properties that received a
questionnaire.

467 delivered to in July 2017.
Number of properties
delivered to 126.2% of the
electoral roll?

Questionnaire response rate elsewhere:
All using 2011 census figure and declared returns

| | population | responses | |
|------------------|------------|-----------|-------------|
| Brancaster | 797 | 115 | = 14% |
| Snettisham: | 2570 | 102 | = 14% |
| South Wooton: | 4247 | 484 | =11% |
| Watton at Stone; | 2272 | 115 | = 5% |
| Castle Acre; | 848 | 409 (555) | = 48% (65%) |

Numbers in Brackets & yellow.

These numbers represent respondent number, 555 and %
age of 2011 census, 65%.

Addresses from KLWNBC

According to KLWN 76 on the 2016 Electoral Roll have no residents on the
Electoral roll we make it 97 based on a higher number of houses delivered to,
(20% or 16%...take your pick!)

| | |
|---|-----------|
| Number on Electoral Roll 2016 | 693 |
| Number of questionnaire (respondents) | 400 (547) |
| % of response | 58% |
| % of response (allowance for -18s 7 visitors 390) | 56% |

The numbers is a really interesting field! We spoke a bit about the numbers section
at one of our meetings and acknowledged at that time that there were going to be
difficulties with accuracy, More can be done on them obviously but there must be a
real need, so that time is not spent on something that will never be accurate. We
probably need to discuss how we represent this in any formal and published
documentation, especially within the plan itself.

These types of figures are by no means an exact Science as the Electoral role is 2
years old, the Census is 6+ years old and the fact that some respondents did not
do exactly what was asked means that we are working between number of actual
questionnaire returns and number of respondents represented on them. This was a
situation which was unavoidable so we have to run with it really. Hence 409 returns
and 555 respondents shown in the figures below;

Number on Electoral Roll 2016 693. We can do little more with this other than point out that the figure of 409 is for mainly over 18s.

Number of questionnaire (respondents) 400 (547). This should now read **409** questionnaires returned representing the views of **555** respondents

% age of response 58%. The %age of responses using respondent numbers and **2011 Census data is 65%**. The % age of returned questionnaires against **census is 48%**. The % age of questionnaire returns against **Electoral Roll is 59%**

% age of response (allowance for -18s 7 visitors 390) 56%. This should now read %age of questionnaire returns (with an allowance for visitors and under 18s of 10) against electoral role is 59%.

Pushing the statistics the % age of respondents against Electoral Roll is 80% and with the under 18 & visitor allowance is 77%.

Section 2 Attendance at Main Consultation Events

Figures in the chart represent the numbers of people attending from each postcode.

| CASTLE ACRE POST CODES . PE32 | ROAD NAME | Initial Event 2nd May 2017 | Drop In Event April 7th 2018 |
