

Workshop: Caring for the Castle site

Friday 6 May 2022

Village hall 10.00

Led by English Heritage.

English Heritage is keen to have local communities supporting the conservation and enhancement of their own local historic environments, including the castle site in Castle Acre.

This workshop will look at the significance of the site and how it is cared for and maintained in the short –and – long term.

It will promote best-practice standards and skills for its care and how volunteers can help with this.
